## PROFESSIONAL EXPERIENCE

---

### Brandywine Global Investment Management

*Global Macro Research Analyst*

Philadelphia, PA

February 2022 – August 2024

- Automated and maintained internal database (4k+ indicators), library of 11k+ charts, enhancing 85% operational efficiency
- Conducted in-depth macro analysis of Canada and performed extensive analysis of inflation trends in major economies, providing valuable insights into currency and sovereign fixed-income strategies to support the asset allocation decision-making process
- Implemented the development of economic indices and robust regression in Python using internal databases, Bloomberg Terminal, and Macrobond data to identify market and economic signals
- Facilitated portfolio managers by assisting in the development of marketing materials, client presentations, and addressing data-related inquiries, resulting in a 20% increase in client engagement and a 15% rise in new business acquisitions

### KPIM Joint Stock Company

*Business Intelligence Analyst*

Hanoi, Vietnam

March 2021 – September 2021

- Utilized data analytics to create dashboard on Power BI to automate capital expenditure analysis and identify opportunities to save the company \$15,000+ annually for savings
- Monitored data updates in Excel (utilizing PivotTable, MATCH, COUNTIF, and VLOOKUP functions) prior to conversion to Power BI to run a comprehensive merger consequence analysis
- Evaluated transition financial performance against benchmarks, driving informed decisions, cost savings, and risk management
- Collected and analyzed COVID data from the Vietnam Ministry of Health through appraisal and insurance reports as well as conducted research on infection trends in Vietnam

### Ernst & Young LLP

*Intern – Assurance Services*

Hanoi, Vietnam

May 2020 – September 2020

- Analyzed data to enhance clients' understanding of the target through analysis of key valuation drivers, including quality of earnings, net indebtedness, and working capital
- Provided clients with financial performance transformation through analytics enablement, growth/strategy, process improvement, cost reduction, and technology implementation
- Managed a team of four to six consultants to interface daily with clients on-site across countries on multiple advisory projects
- Specialized in financial due diligence on both acquisitions and divestitures for private equity clients

### City of Philadelphia – Streets Department

*Intern – Office of the Deputy Commissioner of Streets*

Philadelphia, PA

April 2019 – September 2019

- Organized \$100,000+ worth of vehicle violations to discover billing and expenditures errors
- Processed prime and sub-consultant work orders and invoices of projects measuring up to \$2 million to perform valuation analysis
- Constructed Excel-based reports on the company's financial performance to be used for the company's commission distribution

---

## RESEARCH EXPERIENCE

---

### [The Modern Development of the Clothing Industry's Impacts on Bangladesh's Health and Environmental](#)

*Economics Seminar's Research Paper, Drexel University*

January 2021 – March 2021

- Provided a literature review on short-term and long-term effects of Bangladesh garment industry on health and environment
- Examined Bangladeshi workers' health and safety evaluations and child exploitation issues through historical data compilation
- Identified potential strategies to address these concerns while maintaining a thriving and sustainable industry
